

## Stainless Steel Metal Wire Price 316 Metal Wire Soft Wire Corrosion Resistance

### Our Product Introduction

#### Basic Information

- Place of Origin: Hebei, China
- Brand Name: ANPINGYUDA
- Model Number: stainless steel wire
- Minimum Order Quantity: 5-10rolls
- Price: reconsideration
- Packaging Details: Customized according to customer requirements
- Delivery Time: 3-10days
- Payment Terms: T/T
- Supply Ability: 5000 rolls /day

#### Product Specification

- Product Name: Stainless Steel Wire
- Key Words: 316 Stainless Steel Wire
- Material: Stainless Steel
- Theory: Corrosion Resistance
- Size: Custom-made
- Usege: Packaging And Bundling
- Highlight: 316 Stainless Steel Metal Wire, 316 Metal Wire, corrosion resistance Metal Wire

## Product Description

### Stainless Steel Metal Wire Price 316 Stainless Steel Rod Soft Wire

#### Stainless steel wire product characteristics

Stainless steel wire has corrosion resistance, high strength, heat resistance, wear resistance, smooth surface, hygiene and diversified specifications and other product characteristics, making it an ideal choice for a wide range of applications.

#### Stainless steel wire manufacturing technique

**1.Material selection:** Select the appropriate stainless steel material, according to the specific application requirements and performance requirements, such as 304 stainless steel, 316 stainless steel, etc.

**2.Raw material treatment:** The stainless steel material is smelted, cast or smelted to obtain the desired metal alloy.

**Wire drawing:** The metal alloy is heated to the appropriate temperature, and it is transformed into a fine wire by drawing or extrusion. This process can be used to gradually reduce the diameter of the wire through multiple draws to obtain the desired precision and strength.

**3.Surface treatment:** Surface treatment of stainless steel wire, such as oil removal, pickling, electroplating, etc., to remove dirt and improve surface quality.

**4.Cutting or winding:** According to the specific needs, the stainless steel wire is cut to the required length, or wound into a stainless steel wire roll

**Wear resistance:** After special treatment process, the surface hardness of stainless steel wire is high, and it has good wear resistance and impact resistance. This makes stainless steel wire perform well in situations where it needs to withstand friction and impact.

**Toughness:** Stainless steel wire has high strength, good elasticity, and good toughness and ductility. This characteristic makes stainless steel wire less prone to breakage when subjected to external forces, and also gives it good plasticity, making it easy to process into various shapes and sizes.

**Aesthetics:** Stainless steel wire has a bright and beautiful appearance, suitable for high demand decoration and construction fields. Its unique metallic luster and texture can enhance the overall aesthetics of the product.

Product	Stainless steel wire
Grade	304/304L/309s/310s/316/316L/410/420/430 etc.
Diameter	0.2-14mm
Length	As requirements
MOQ	1 Ton
Application	Foodstuff, Gas, metallurgy, biology, electron, chemical, petroleum, boiler, nuclear energy, Medical equipment, fertilizer etc
Package	Covered with a layer of plastic film, put it in the wooden box
Price Terms	FOB, EXW, CIF, CFR
Payment Terms	30% TT for deposit, 70% TT / 70% LC at sight balance before shipment

#### Company introduction

Anping Yuda Wire Mesh Co., Ltd. was founded in 1994. We have achieved constant development in the past years and have now grown into a comprehensive company involved in production and export of series metal wire and other hardware products
