## Product Description

### Outdoor decorative artificial turf plastic lawn synthetic grass for garden

Plastic lawn refers to an artificial grass or synthetic turf made from plastic materials. It is designed to resemble natural grass and is used as a replacement or alternative to real grass in various applications.

Added drain holes to the bottom of the grass turf great performance a draining, Automatic water seepage filtration , no fear of mildew more smooth drainage, no water , easy to clean up , away from bacteria.

#### Plastic lawns offer several advantages:

**Low maintenance:** Unlike natural grass, plastic lawns do not require mowing, watering, or fertilizing. They are relatively low maintenance and can save both time and money on upkeep.

**Durability:** Plastic lawns are designed to withstand heavy foot traffic and diverse weather conditions. They are resistant to wear and tear, making them suitable for high-use areas.

**Appearance:** Modern plastic lawns closely mimic the look and feel of natural grass. They come in different shades of green, with variations in blade length and density, providing a realistic appearance.

**Water conservation:** Plastic lawns are water-efficient as they do not require watering. This helps in conserving water resources, particularly in regions facing water scarcity or where water restrictions are in place.

**Allergy-friendly:** For individuals with grass allergies, plastic lawns provide a hypoallergenic alternative as they do not produce pollen or trigger allergic reactions.

*Added drain holes to the bottom of the grass turf great performance a draining, Automatic water seepage filtration , no fear of mildew more smooth drainage, no water , easy to clean up , away from bacteria*

#### Natural looking of artificial grass
