## Product Description

### High Strength 16 Gauge Pvc Coated Metal Wire Cutting Binding Cut Wire

#### Pvc coated wire product characteristics

Polyvinyl Chloride Wire is a filament-like product made from polyvinyl chloride (PVC) material. It has the following product characteristics:

1. Corrosion resistance: PVC wire has good corrosion resistance and can resist acid, alkali, salt and other corrosive media. This makes it advantageous in some humid or corrosive environments, such as interior decoration, wire insulation and other applications.
2. Electrical insulation: PVC wire is an insulating material that can effectively isolate current and provide good electrical insulation performance. Therefore, it is often used in wire and cable manufacturing, electrical equipment insulation and other fields.
3. Lightweight: PVC wire is relatively light and has low density, which makes it possible to reduce the overall weight and load in some applications and improve the convenience of use.
4. Rich in color: PVC wire can achieve different colors and appearance effects by adding pigments, with a rich choice of colors.
