

## Electric Galvanized Finishing Nails Zinc Coated Nails Steel

### Our Product Introduction

for more products please visit us on [wire-metalmesh.com](http://wire-metalmesh.com)

#### Basic Information

- Place of Origin: CHINA
- Brand Name: YUDA
- Model Number: Nails
- Minimum Order Quantity: 2 Ton
- Price: US \$550.00 - 680.00/ Ton
- Packaging Details: Customized according to buyer's requirements
- Delivery Time: 3-10 day
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 Ton/ day

#### Product Specification

- Product Name: Electric Galvanized Finishing Nails
- Key Words: Steel Nails
- Strength: About 500 ~ 1300 Mpa.
- Surface Treatment: Galvanized
- Usage: Building Construction
- Shank: Smooth Shank
- Length: 1/2"-6" Or Customized
- Packaging: Customization
- Highlight: **Electric Galvanized Finishing Nails, Galvanized Finishing Nails Zinc Coated, Zinc Coated Nails Steel**

## Product Description

### Electric Galvanized Finishing Nails Zinc Coated Nails Steel Nail

#### Nails specifications

Name of item: Polished common nail, iron wire nail

Materials: Low carbon steel Q195 or Q235

Size range: 1/2"-6"

Popular Sizes: 2×25mm, 2.5×50mm, 3.4×65mm, 4×75mm, 4.5×100mm, 4.5×125mm

Strength: About 500 ~ 1300 mpa.

Product features: Flat cap, round bar, diamond, pointed strong, smooth surface, rust.

#### Nails Theory

Corrosion resistance is provided by forming a zinc protective layer on the nail surface. The galvanizing process uses an electrochemical method called electroplating. Through the galvanizing process, a uniform zinc metal layer is formed on the surface of the nail, which provides corrosion protection for the nail. Zinc has excellent anti-corrosion properties and can chemically react with oxygen and water to form a dense layer of zinc oxide, which further blocks the contact between the nail and the external environment, thereby reducing the occurrence of corrosion.
