Product Description

Electro-Galvanised Or Hot-Dip Galvanised Field Fence Corrosion Resistant

Electro-galvanising and hot-dip galvanising are both reliable anti-corrosion treatments for farm fencing, they effectively protect the fence from corrosion and damage, ensuring the stability and longevity of your farm fence.

Cattle fence is one type of field fence best suited for large areas. If you breed deer, cattle, horse, sheep and other animals, cattle fence is the best choice as borders in the fields and grassland. Cattle fence can help keep your livestock in where they belong and protect them from the violation of any outside predators.

Fixed knot deer fence is made of high tensile strength galvanized steel wires with a fixed knot design in variety of heights and spacing. It is the most common and widely used types of deer fence.

It can be attached to nearby trees or columns or be raised with steel posts such as star pickets or U posts.

Cattle fence is widely used for grassland, breeding, forestry, site fencing or isolation of sites or projects
