UNDERGROUND MESH

The warning network has the following characteristics:

Bright colors: Warning nets usually use bright colors, such as orange, red, or yellow, to ensure that they are easily noticed and recognized by people.

Light and easy to install: Warning nets are usually made of lightweight plastic material and are easy to carry and install. They can be held in place by means of clamps, ropes or braces.

Durability: Warning nets usually have weather resistance and durability, and can be used for a long time in indoor and outdoor environments. Warning network plays an important role in improving safety awareness, reducing accidents and guiding the flow of people. However, when using warning nets, ensure that they are properly installed and fixed, as well as comply with local safety standards and regulations.
