

## Road Safety Fence Plastic Barrier Fence / Safety Warning Plastic Snow Fence

Our Product Introduction

for more products please visit us on [wire-metalmesh.com](http://wire-metalmesh.com)

### Basic Information

- Place of Origin: CHINA
- Brand Name: YUDA
- Model Number: Plastic flat net
- Minimum Order Quantity: 100 Square Meter
- Price: US \$0.6 - 2.8/ Square Meter
- Packaging Details: Customized according to buyer's requirements
- Delivery Time: 3-10 day
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 200000 Square Meters/ day

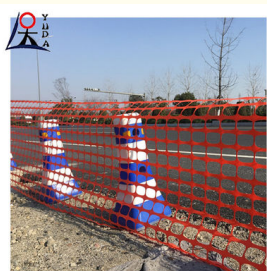

### Product Specification

- Product Name: Plastic Net
- Key Words: Road Safety Fence Plastic Barrier Fence/Snow Mesh Fence/Safety Warning Mesh
- Color: Black, White, Green, Orange, Red Or Customized
- Material: HDPE
- Hole Shape: Square
- Weight: Lightweight
- Mesh Type: 25-60 Mesh
- Application: Packaging, Gardening, Construction
- Highlight: **Safe plastic barrier fence,  
Safe plastic snow fence,  
Safety Warning plastic barrier fencing**

## Product Description

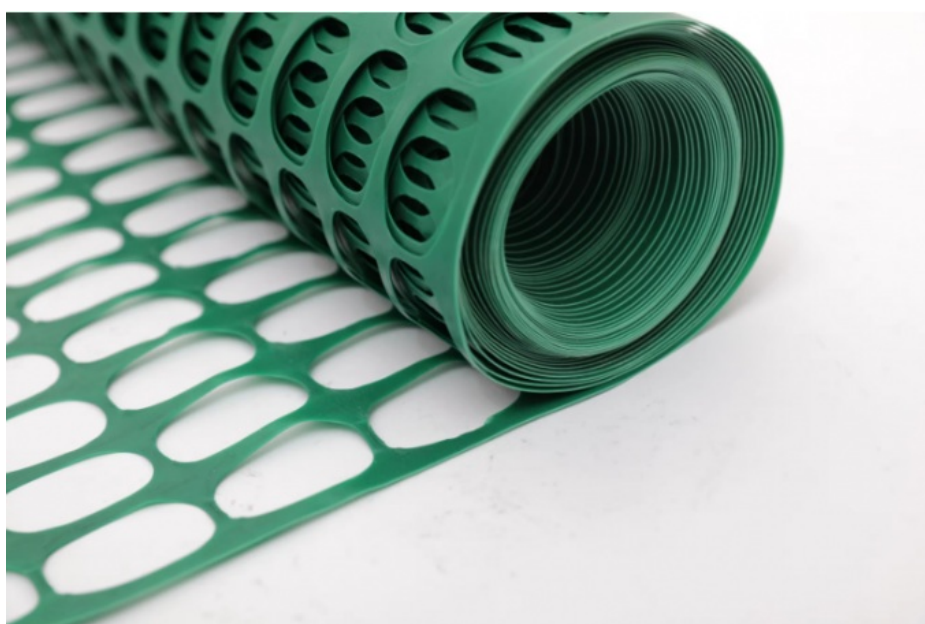

### Road Safety Fence Plastic Barrier Fence/Snow Mesh Fence/Safety Warning Mesh

#### Plastic warning net

The HDPE plastic plain netting is a food grade plastic raw material(HDPE) which is heated and melted in an extruder, extruded through a screw, and enters an extra-rotary head with a small hole in the surface of the mold. The molten plastic flows through the pores of the die to form two molten filaments. Because the machine head rotates, the two strands of wire are joined together at one point, and then cooled and shaped into a net.

Product Name	Wholesale Custom Heavy Duty 100% PE Warning Barrier Plastic Fence Net for Construction
Material	100%PE with UV
Color	Orange ,green,yellow , blue ,black
Weight	150-200gsm
Size	70x40mm
Width	1.5/1.8m
Length	30-50m
Usage	safety fence , warning barrier

The main function of the warning network is to provide visible signs and warnings in the construction site, construction site, road engineering, sports venues, public places and other places. It can be used in the following situations:

**Safety warning:** The warning network can identify dangerous areas, construction areas or other places that need to be warned to remind people to pay attention to safety.

**Restricted areas:** Warning nets can be used to demarcate restricted areas to prevent people or vehicles from entering specific areas, such as construction sites or enclosed areas.

**Guidance:** Warning nets can be used to guide people to follow a specific path to avoid entering dangerous areas or impeding the construction process.

**The warning network has the following characteristics:**

**Bright colors:** Warning nets usually use bright colors, such as orange, red, or yellow, to ensure that they are easily noticed and recognized by people.

**Light and easy to install:** Warning nets are usually made of lightweight plastic material and are easy to carry and install. They can be held in place by means of clamps, ropes or braces.

**Durability:** Warning nets usually have weather resistance and durability, and can be used for a long time in indoor and outdoor environments.

Warning network plays an important role in improving safety awareness, reducing accidents and guiding the flow of people. However, when using warning nets, ensure that they are properly installed and fixed, as well as comply with local safety standards and regulations.
