

Highway Road / School Sound Barrier Panel Outdoor Sound Barrier Walls Commercial Metal Sheet

Our Product Introduction

for more products please visit us on wire-metalmesh.com

Basic Information

- Place of Origin: CHINA
- Brand Name: YUDA
- Model Number: Sound barrier
- Minimum Order Quantity: 50 Piece
- Price: Determined by size and quantity
- Packaging Details: Customized according to buyer's requirements
- Delivery Time: 3-10 day
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 200000 Meters/ day

Product Specification

- Product Name: Sound Barrier
- Key Words: Outdoor Sound Barrier
- Panel Style: Steel Panel, PC Board
- Application: Highway, Railway, Noise Barrier, etc
- Panel Thickness: At Your Request
- Panel Length: 2m~4m Can Custom
- Feature: High Stability, Eco-friendly, Effective Railway Noise Barrier
- Sheets Thickness: 0.8-1mm, Can Be Customized
- Highlight: **Highway outdoor sound barrier walls commercial**
, Road outdoor sound barrier walls commercial,
School sound barrier panel

Product Description

Highway Road / School Sound Barrier Panel Sound Fence Wall Metal Sheet

Road Noise Barrier is a specially designed acoustic barrier that stands between a noise source and a sound receiving point. It is mainly designed for a specific sound source and a specific protected location (or area), and is mainly used for sound insulation and noise reduction of highways, highways, elevated composite roads, and other noise sources.

Significant noise reduction effect: The sound barrier on highways can effectively block and absorb the noise generated by vehicles while driving, significantly reducing the interference of noise on residents and the environment on both sides of the road. This helps to improve the quality of life for residents, while also protecting the tranquility of the surrounding environment.

Protecting the ecological environment: The establishment of sound barriers helps to reduce the impact of noise on the habitats and living environment of wildlife, thereby protecting ecological diversity.

Improving traffic safety: Sound barriers can reduce driver distraction caused by noise interference, improve driver alertness and responsiveness, and thus improve traffic safety to a certain extent.

Strong weather resistance: Highway sound barriers are usually made of materials with strong weather resistance, which can withstand various harsh weather conditions and ensure long-term stable noise reduction effects.

Structural stability: The structural design of the sound barrier is stable and has strong wind resistance, ensuring that there will be no deformation, damage or other problems during long-term use.

Significant economic benefits: Although the initial investment in sound barriers may be high, considering their long-term noise reduction effect, improvement of residents' quality of life, ecological environment, and the resulting social benefits, their economic benefits are significant.

METAL SHEET				
PANEL HEIGHT	PANEL LEHGTH	SHEET THICKNESS	SHEET THICKNESS	PANEL TYPE
0.5m 1.0m	2.0m 2.5m 3.0m 4.0m	80mm 100mm 120mm	1.0-1.5mm	shutter or perforated

FAQ

Q: Are you a factory or trading company?

A: We are a factory.

Q: What certificate do you have?

A: We have ISO and CE certificate.

Q: How does your factory do regarding quality control?

A: We have a special QC department in charge of products' quality.

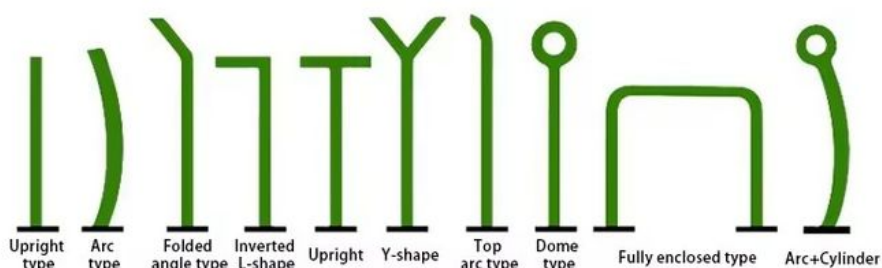

Q: How long is the warranty period?

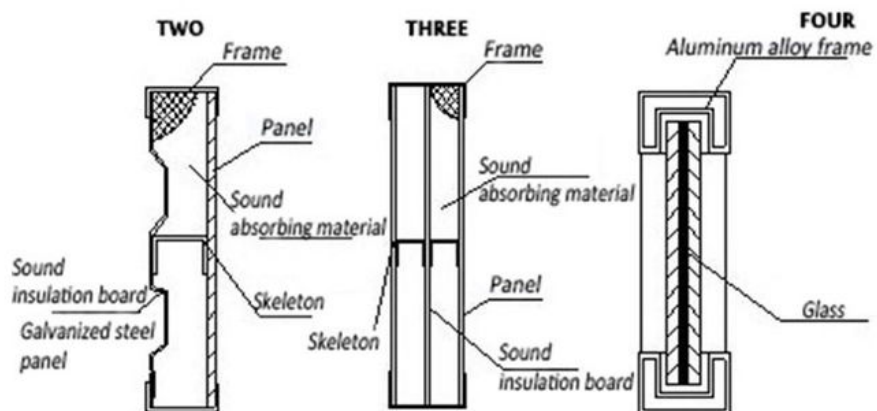

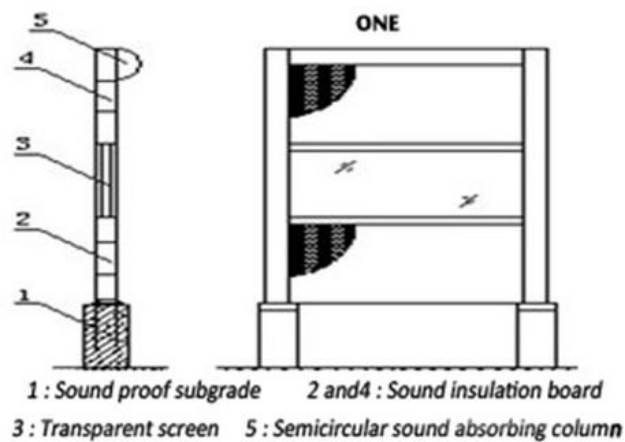

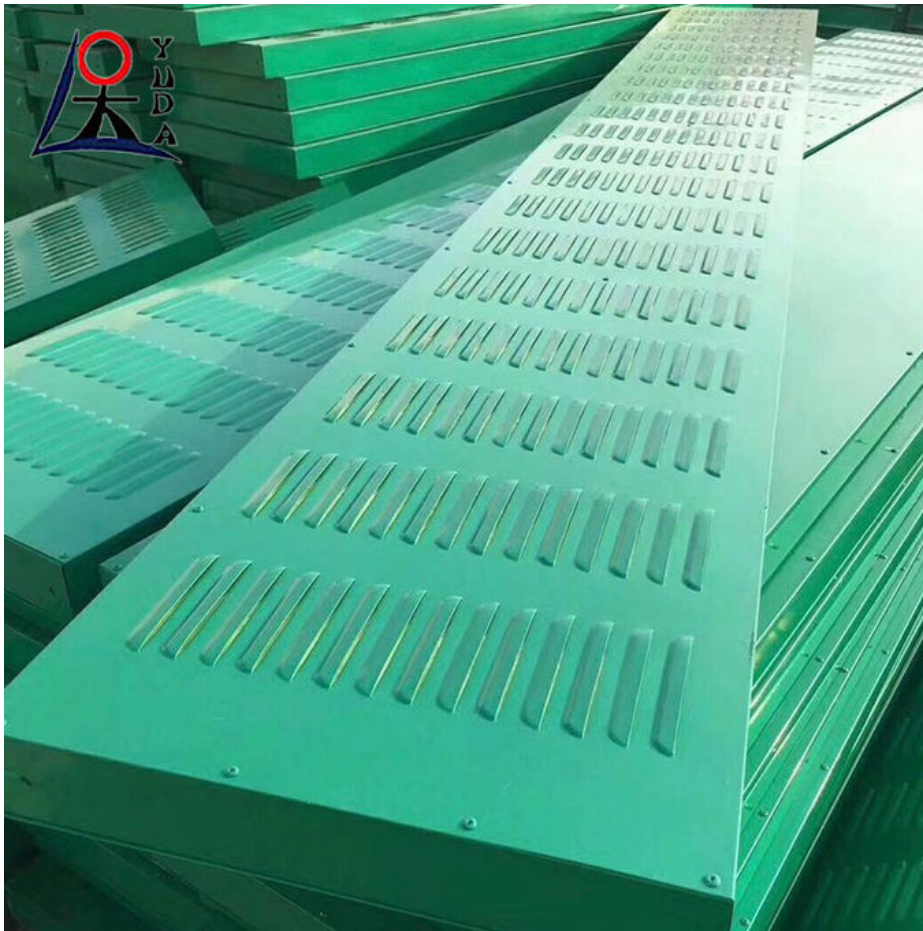

A: All of our products have one year warranty.

Q: What's the main market of your company?

A: We have customers all over the world.
