### Razor Blade Wire Mesh Roll BTO-22 Security Razor Barbed Wire Mesh

Blade stabbing ropes are widely used in many fields, such as industrial and mining enterprises, garden apartments, border outposts, military fields, prisons, detention centers, government buildings, and other security facilities.

#### For Concertina Wire ,we have many kinds:

Single coil Razor Wire ,Crossed Razor Wire,Flat warp razor wire. ,Razor Wire fence

#### Single Coil Razor Wire

Single coil Concertina Wire is installed without clips, it runs in natural loops on walls.Cost less and can be easily installed.

#### Crossed Razor Wire

Two pieces of razor wire were bounded together by clips to make it more strength.The spiral intersecting barbed wire presents an intersecting shape after opening with beautiful feature and practicality.

#### Flat warp razor wire

Flat warp razor wire is a new type of razor barbed wire. Press two loops into flat then expand them across. We usually use it together with been line razor barbed wire to build a defending wall, or use it alone as a fence.

#### Razor Wire Fence

Welded razor mesh fence is a new form of razor bared wire mesh for security,it with practicality blade and the feature looks very beautiful.It can be used for guard net of fence ,doors and windows.The specification can be designed as the customers' need.

The periphery of the blade stabbing rope is often treated with rust prevention, such as plastic paint coating or spray coating. These treatments not only enhance the ability of rust prevention and corrosion prevention, but also make the blade stabbing rope more durable and can improve the protection time of the wire mesh to a certain extent. In addition, there are multiple colors to choose from for the blade stabbing rope, which can be reasonably matched according to the on-site environment.
