Product Description

Aluminum Alloy Mosquito Net Insect Mosquito Window Screen Anti Dust Window

Aluminum screen mesh is also called aluminum magnesium alloy wire netting, epoxy resin paint aluminum window screen and aluminum wire netting.

Significant thermal insulation performance: Aluminum alloy window screens can effectively isolate the hot air from the outside, providing a cool and comfortable environment indoors, reducing the use of indoor air conditioning, and reducing energy consumption.

Ventilation and protection combined: Aluminum alloy window screens can effectively prevent the invasion of insects and small animals such as mosquitoes, flies, and mice while ensuring ventilation, maintaining a clean and hygienic indoor environment.

Fire resistance and flame retardancy: Compared with general nylon window screens, aluminum alloy window screens have better fire resistance performance and can meet the fire protection needs of buildings.

For screening that covers all the bases, there's no better choice than aluminum mesh screens.
