Gabions baskets are rectangular baskets made of heavily galvanized, double twisted, steel woven wire mesh. The single unit constructed baskets are assembled, laced together and then filled with stone to form a monolithic structure. Gabions and Reno mattresses are used for retaining walls, sound barriers, channel linings, slope stabilization, dams and weirs. They are particularly effective in restoring the environment and promoting vegetation growth.

According to its weave method, it includes hexagonal gabion mesh and welded gabion mesh. Gabion mesh could be electro galvanized gabion mesh, hot dipped galvanized gabion mesh, zinc- aluminum -mischmetal (Zn-Al-MM) alloy gabion mesh (Galfan gabion mesh), polyester powder(PVC) coated gabion mesh and polyester powder(PVC) coated after galvanized gabion mesh etc.

Material: high quality low carbon steel wire( hot-dip galvanized wire, electro galvanized wire or PVC coated wire.)

Application: This kind of products is widely used to prevent soil erosion and retain soil particles, reduce water velocities and recapture river bed sediment in streams; also used mostly in the civil engineering industry especially in the construction of roads; recently due to their environmental benefits, they are used in various Application and industries.
