#### Basic Information

- Place of Origin: CHINA
- Brand Name: YUDA
- Model Number: Nails
- Minimum Order Quantity: 2 Ton
- Price: Reconsideration
- Packaging Details: Customized according to buyer's requirements
- Delivery Time: 3-10 day
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 Ton/ day

#### Product Specification

- Product Name: Galvanized Ground Pin Ground Stake Sod Staple
- Key Words: U Type Nails
- Surface Treatment: Galvanized And Painted
- Usage: Building Construction
- Material: Low Carbon Steel
- Sample: Free Sample
- Length: 50mm-300mm
- Diameter: 2.0mm-5.0mm
- Highlight: **Sample free Grass Fixing Pins ,  
Building Construction Grass Fixing Pins ,  
Garden Staples Grass Fixing Pins**

## Product Description

### Landscape Sod Garden Staples Grass Fixing Pins Galvanized Staples

Lawn nail is a tool used to fix artificial turf, grass or temporarily lay grass, commonly found in sports fields, courtyards and other scenes.

#### Common types

U-shaped nail: with a curved U-shaped design, it can be extended and fixed after penetrating the lawn, suitable for temporary or short-term use.

Plastic nails: lightweight and environmentally friendly, commonly used in children's activity areas to avoid the sharp risk of metal nails.

Metal nail: made of galvanized or stainless steel material, with strong corrosion resistance, suitable for long-term outdoor environments.

Rubber nail: Good elasticity, strong protection for the bottom of the lawn, suitable for high-frequency use areas.

#### Material and Characteristics

Metal nails: High durability, but attention should be paid to rust prevention treatment (such as galvanizing).

Plastic nails: Low cost, easy to install, but long-term exposure may cause aging and deformation.

Rubber nail: With excellent flexibility, it reduces damage to the roots of the lawn.

<b>Product name</b>	Turf nails
<b>Material</b>	Steel
<b>Surface treatment</b>	Galvanized
<b>Width</b>	10mm-40mm
<b>Length</b>	50mm-300mm
<b>Diameter</b>	2.2mm-5.0mm
