

## U-Type Turf Staples Galvanized Painted for Artificial Grass Installation

### Our Product Introduction

#### Basic Information

- Place of Origin: CHINA
- Brand Name: YUDA
- Model Number: Nails
- Minimum Order Quantity: 2 Ton
- Price: Reconsideration
- Packaging Details: Customized according to buyer's requirements
- Delivery Time: 3-10 day
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 Ton/ day

#### Product Specification

- Product Name: Galvanized Ground Pin Ground Stake Sod Staple
- Key Words: U Type Nails
- Surface Treatment: Galvanized And Painted
- Usage: Building Construction
- Material: Low Carbon Steel
- Sample: Free Sample
- Length: 50mm-300mm
- Diameter: 2.0mm-5.0mm
- Highlight: **Painted Turf Staples, Galvanized Turf Staples, Artificial Grass Turf Staples**

## Product Description

### U-Type Turf Staples For Artificial Grass Rust Proof Sod Pins Stakes

#### Common types

U-shaped nail: with a curved U-shaped design, it can be extended and fixed after penetrating the lawn, suitable for temporary or short-term use.

Plastic nails: lightweight and environmentally friendly, commonly used in children's activity areas to avoid the sharp risk of metal nails.

Metal nail: made of galvanized or stainless steel material, with strong corrosion resistance, suitable for long-term outdoor environments.

Rubber nail: Good elasticity, strong protection for the bottom of the lawn, suitable for high-frequency use areas.

#### Material and Characteristics

Metal nails: High durability, but attention should be paid to rust prevention treatment (such as galvanizing).

Plastic nails: Low cost, easy to install, but long-term exposure may cause aging and deformation.

Rubber nail: With excellent flexibility, it reduces damage to the roots of the lawn.

#### Installation method

Tools: Usually require a nail or specialized lawn nail gun to press and fix the edges of the lawn.

Location: evenly distributed along the edge of the lawn (e.g. 1 nail every 0.5 meters) to avoid excessive density.

Depth: Penetrating the fiber layer of the lawn and fixing the bottom fabric to avoid damaging the bottom drainage layer.

#### Applicable scenarios

Artificial turf laying, turf splicing, temporary sports field maintenance, etc.

Choose matching nails based on the type of lawn (such as grass fiber density, base fabric material).

<b>Product name</b>	Turf nails
<b>Material</b>	Steel
<b>Surface treatment</b>	Galvanized
<b>Width</b>	10mm-40mm
<b>Length</b>	50mm-300mm
<b>Diameter</b>	2.2mm-5.0mm
