

## Football Landscape Turf Lawn Plastic Grass Floor Artificial Grass Turf Lawn

### Our Product Introduction

for more products please visit us on [wire-metalmesh.com](http://wire-metalmesh.com)

#### Basic Information

- Place of Origin: China
- Brand Name: Yuda
- Certification: IOS
- Model Number: plastic lawn
- Minimum Order Quantity: 10pieces
- Price: Reconsideration
- Packaging Details: roll/packet
- Delivery Time: 3-10days
- Payment Terms: T/T
- Supply Ability: 5000pieces/day

#### Product Specification

- Product Name: Plastic Lawn
- Key Words: Decorative Artificial Turf Plastic Lawn
- Material: Plastic
- Color: Green
- Size: Various Sizes Available
- Weatherproof: Yes
- Highlight: Artificial Grass Turf Lawn,  
Football Landscape Turf Lawn

## Product Description

### Football Landscape Turf Lawn Plastic Grass Floor Artificial Grass Turf Lawn

**High degree of appearance simulation:** The grass fibers of plastic lawns are bright and rich in color, with a soft texture. They not only present a fresh green color similar to natural lawns, but also have a good touch, making it comfortable to step on like real grass. The simulation effect is excellent and can bring people an experience close to nature.

**Strong durability:** It has the characteristics of wear resistance, weather resistance, corrosion resistance, etc., and can withstand various natural environments such as high temperature, strong wind and rain, and ultraviolet radiation. It is not easy to fade, deform or damage, and has a long service life, generally up to 10 years or more.

**Low maintenance cost:** There is no need for tedious maintenance work such as pruning, fertilizing, watering, weeding, etc. like natural lawns. Only regular cleaning of fallen leaves, dust, and debris is needed to maintain the appearance, greatly reducing maintenance costs and manpower investment.

**Good environmental performance:** Made of environmentally friendly plastic materials, free of harmful substances, non-toxic and harmless to human health and the environment. At the same time, it does not require the use of pesticides and chemical fertilizers, reducing pollution to soil and water sources, and can be recycled and reused, in line with the concept of sustainable development.

**Excellent drainage performance:** It usually has good drainage performance, with a well-designed bottom structure that can quickly drain rainwater and other accumulated water. Even after heavy rain, it can be quickly restored to use without any water accumulation affecting its use.

Model No.:	Unny-2017
Guage:	3/8"
Grass Yarn:	PP+ PE Monofilament,UV resistant
Dtex:	7500
Pile Height:	20mm
Stitches per 10 cm:	17 stitches
Density(number of nodes/sqm)	17850
Roll Width	200cm/300cm/400cm
Roll length	depends on the site size
Water permeability	60lt/min/
Color Fastness	according to the highest standards DIN 54004(min7)approved
UV Stability	according to the highest standards 6000 hrs weather 0 meter test,based on DIN 53387
Waranty	6-7 years

*Our landscape grass uses PP+PE yarn, combine flame-retardant raw materials with PE and PP to make our grass fire-resistant , When it comes to open fire, it melts but does not burn*

*Customized design is available OEM ODM are welcome*

*Made from lightweight yet super-strong high density polyethylene. Density is great in not being able to see through it.That's soft to the touch but looks realistic. It can be easily attached to any wooden frame or chain link fence.Includes green accessory fasteners.You can cut with scissors to fit any shape or point you want to fill.*

*Added drain holes to the bottom of the grass  
turf great performance a draning, Automatic  
water seepage filtration , no fear of mildew  
more smooth drainage, no water , easy to  
clean up , away from bacteria*
