

Expandable Steel Mesh Fence Screen Net With Width Range Of 0.5-2m And Customizable Length

Our Product Introduction

for more products please visit us on wire-metalmesh.com

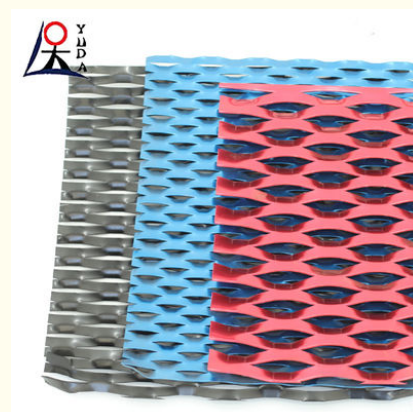

Basic Information

- Place of Origin: CHINA
- Brand Name: YUDA
- Model Number: Expanded metal mesh
- Minimum Order Quantity: 50 Meters
- Price: Further discussion based on quantity
- Packaging Details: Customized according to buyer's requirements
- Delivery Time: 3-10 day
- Payment Terms: T/T, L/C, D/A, D/P, Western Union, MoneyGram
- Supply Ability: 200000 Meters/ day

Product Specification

- Product Name: Expanded Metal Mesh
- Key Words: Highly Corrosive And Durable
- Material: Low Carbon Steel /stainless Steel / Aluminum/copper Etc.
- Hole Shape: Diamond Hole, Hexagonal, Etc,
- Thickness: 0.1 - 8mm Or Custom
- Length: 1-50m/roll , Customers' Requirement
- Width: 0.5-2m, Customers' Requirement
- Wire Diameter: Requirement
- Highlight: **Expandable Steel Mesh Fence Screen, expanded steel mesh Net, Customizable Length expanded steel mesh**

Product Description

Expand Metal Wire Mesh Expanding Fence Screen Net Expanded Steel Mesh

The metal plate first undergoes punching process to punch specific shapes and sizes of holes on the plate. Then, through stretching process, the punched plate is stretched to change the shape of the holes and form a mesh structure. At the same time, the metal wire stems also become stronger during the stretching process. Finally, they are cut according to the needs to obtain steel plate mesh of different sizes.

Excellent anti slip and safety performance

The diamond shaped mesh overlaps vertically, forming a concave convex surface similar to a "fish scale", with a high friction coefficient, which can provide good anti slip effect even in humid and oily environments.

Typical applications: stair treads, oil tanker foot nets, workshop anti slip floors, etc

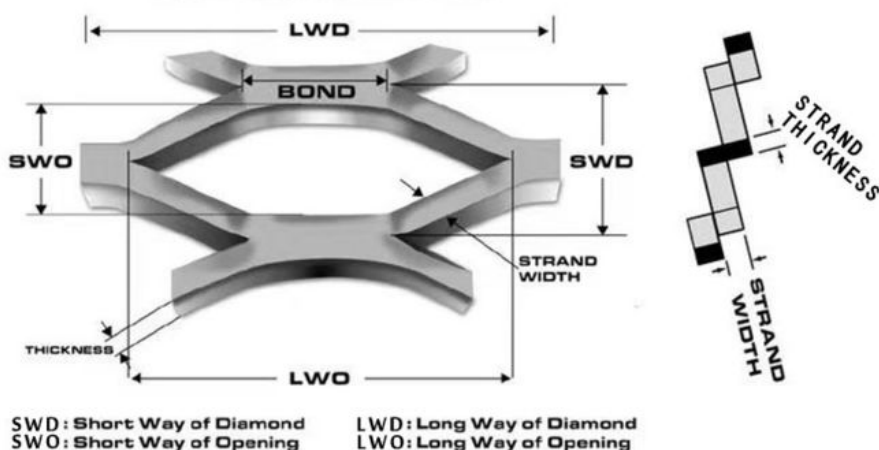

Transparency and self-cleaning ability

The mesh holes are evenly distributed, with ventilation, light transmission, and air permeability characteristics, which can reduce wind resistance (such as reducing the load of typhoons on scaffolding with external scaffolding). At the same time, rainwater can be quickly discharged through the mesh holes during rain, making it less likely to accumulate water and reducing dirt accumulation.

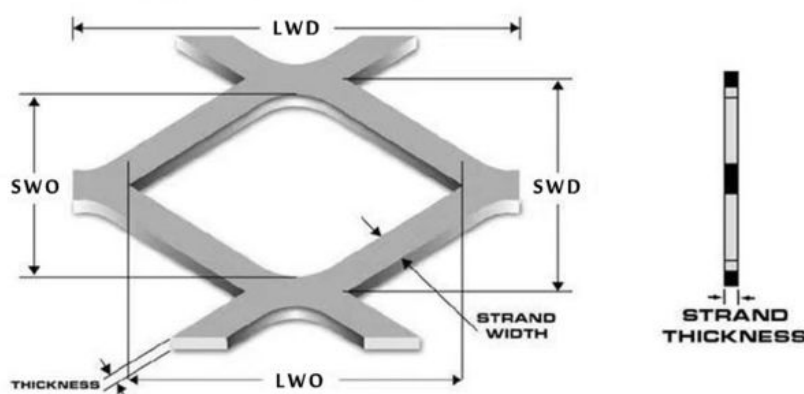

Application scenarios: Building exterior wall protective nets, balcony fences, greenhouse ventilation nets, etc.

Thickness (mm)	SWD (mm)	LWD (mm)	Wire stems width (mm)	Width (m)	Length (m)	Weight (kg/m ²)
0.5	2.5	4.5	0.5	0.5	1	1.8
0.5	10	25	0.5	0.6	2	0.73
0.6	10	25	1	0.6	2	1
0.8	10	25	1	0.6	2	1.25
