

Building Reinforced Fiberglass Woven Mesh Cloth Glass Fiber Fabric Roll

Our Product Introduction

Basic Information

- Place of Origin: CHINA
- Brand Name: YUDA
- Certification: IOS
- Model Number: Glass fibre mesh
- Minimum Order Quantity: 100 Square Meter
- Price: Further discussion based on the purchase quantity
- Packaging Details: Customized according to buyer's requirements
- Delivery Time: 3-10 day
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 5000 rolls/ day

Product Specification

- Product Name: Fiberglass Mesh
- Key Words: Reinforced Fiberglass Mesh Netting For Concrete Fiberglass Mesh Plaster Net
- Material: Fiberglass Yarn
- Size: Can Be Custom Made
- Colors: White, Yellow, blue
- Aperture: 4*4mm, 5*5mm Etc.
- Coating: Emulsion Coated, Urea Glue Coated
- Highlight: **Roll Woven Mesh Cloth, Reinforced Fiberglass Woven Mesh Cloth**

Product Description

Building Reinforced Fiberglass Woven Mesh Cloth Glass Fiber Fabric Roll

Glass fiber mesh fabric is mainly made of medium alkali or alkali free glass fiber yarn, which has good chemical stability and is mainly composed of silicates.

It is twisted and woven by a special organizational structure - leno weave to form a glass fiber woven fabric. Then, it is soaked in a polymer alkali resistant lotion coating, alkali resistant solution, reinforcing agent and other high temperature heat setting treatment to make the mesh fabric have better performance.

characteristic

Good chemical stability: resistant to alkali, acid, water, cement erosion and other chemical corrosion, able to maintain stable performance in different chemical environments, strong adhesion with resin, easily soluble in styrene, etc.

High strength, high modulus, and light weight: Glass fiber itself has high strength, and the mesh cloth made of it has high tensile strength in both the warp and weft directions, which can withstand large external forces. At the same time, it is relatively light in weight, making it easy to construct and transport.

Good dimensional stability: It has the characteristics of rigidity and flatness, is not easy to shrink or deform, has good positioning, can maintain stable shape and size during construction, and is easy to install and use accurately.

Good toughness: It has good impact resistance and can effectively absorb and disperse external impact, reducing damage caused by impact.

Other features: It also has anti mold, anti insect, fireproof, thermal insulation, sound insulation, insulation and other characteristics, which can meet the needs of different scenarios.

Application	Wall Materials Fiberglass mesh
Weight	50-1800g Support customization
Width	Support customization
Mesh Size	Support customization
Weave Type	Plain Woven
Yarn Type	E-glass
Alkali Content	Alkali Free
Standing Temperature	-70 - +550
Processing Service	Cutting, Decoiling, Bending
Mesh Size	Customized
Product name	Fiberglass Mesh Cloth
Material	100% Fiberglass
Feature	Great Alkaline-resistant Fiberglass Mesh
Fiberglass sample	Provide Fiberglass Mesh Sample
Length	50m Support customization

OUR ADVANTAGES

Why choose us? We have 4 advantages

01

High quality raw materials

Alkali-resistant glass ball has good alkali resistance and high tensile force.

02

High density web

Heat preservation, water-proof, strong stability.

03

Environmental protection and odorless

Free of formaldehyde.

04

Factory direct sale

Large inventory, preferential price
